

# inefi – Complete Android Platform Support for Enterprises

Revolutionizing Device Management with inefi Spotlight & inefi Aura

inefi is committed to delivering comprehensive support for the Android ecosystem, empowering enterprises in Retail, Hospitality, and beyond. Our solutions are engineered to maximize device performance and ensure smooth operations, whether you're leveraging Android GMS\*, Android Universal Non-GMS, or Android on Intel x86.

## inefi Spotlight (MDM)

- **Unified Device Management**

Seamlessly manage Android devices across GMS, Universal, and Intel x86 platforms, the features of MDM plus powerful Kiosk mode.

- **Advanced Remote Capabilities**

Efficiently troubleshoot and monitor devices, reducing downtime and support costs.

- **Deep peripheral Integration**

Support for Android-specific features, plus deep peripherals and security policies, enhancing device performance in complex environments.

## inefi Aura (Native Android OS)

- **Optimized for Intel x86**

Bringing the power of Android to high-performance Intel x86 hardware, perfect for POS, kiosks, and self-service devices.

- **Flexible OS Deployment**

Full flexibility to migrate from Windows, Linux and ChromeOS to Android 13 Universal (Non-GMS) providing the comfort when investing in Intel x86 solutions for your enterprise's needs.

- **Enhanced Peripheral Support**

Full compatibility with advanced peripherals, ensuring smooth and efficient device integration.

# The inefi Advantage Seamlessly Bringing Android to Intel!

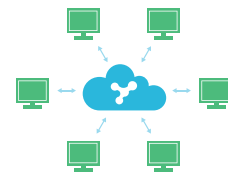

## Complete Flexibility

From GMS to Universal to Intel x86, inefi ensures your Android devices are fully managed and optimized.
